

Euston Skills Centre

Brief

To implement security measures in the reception of the New Skills Centre located at the HS2 Euston site which delivers practical construction and green skills to 16 + students and approximately 30 staff.

Solution

Hatfield Interiors specified **3 x Record Vision Touch Speed Gates** complete with sophisticated detection technology to only allow access to authorised students and staff.

Result

The speed gates form a sleek and uninterrupted barrier, enabling a swift and constant flow of people without compromising on security and seamlessly blending with the reception area.

India Brenchley, Commercial Manager, Hatfield Interiors commented:

“During the installation process some changes were made to the layouts which required some adjustments to the speed gates and in particular how they were attached to the floor. Record was extremely responsive and accommodating to ensure a seamless process. I would highly recommend Record.”

“The speed gates are very easy to use and our staff and students are very happy with them. They are visually appealing and provide a good level of security for the centre”

Andrew Connor
Euston Skills Centre - General Manager
