

# The National Treatment Centre

## Brief

To provide hermetically sealed entrances to the National Treatment Centre in Inverness, a new and unique purpose built facility offering ophthalmology and orthopaedic services to the surrounding communities.

## Solution

Record supplied and installed 17 x CLEAN K1-A Hermetic Sealing Single Sliding Doors for 5 operating theatres and several of the consultation rooms, creating airtight seals to prevent the transmission of bacteria and/or particles via airflow entering the rooms.

## Result

Doors customised to suit the style of this centre whilst providing the highest level of hygiene possible to create a safe environment for patients, visitors and staff alike.

Tailor-made door can be adapted for all requirements including door finish, surfaces, design, door frame and cores.

Door leaves finished in a high pressure laminate, which are durable and easy to clean to prevent germs from spreading.

Suitable for operating theatres, cleanrooms, laboratories, kitchens, humid environments and sensitive areas (X-ray).
